

PERFORMANCE

FOR THE LONG RUN

Unrivaled power section design and performance you can count on to consistently deliver high ROP and extended runs downhole.

About Us

For over 25 years, PV has set itself apart among power section providers, pushing the limits on design, performance and quality.

We take pride in strict production tolerances, high-quality inspection standards and competitive power section delivery and service. Our elastomer chemists and applications engineers create solutions which yield consistent performance for our customers.

At PV, we don't just manufacture power sections. Our employees are passionate experts in their field, and our Applications Engineers and Power Section Performance Advisors have years of experience to advise on the right product for any specific application.

HS88 Elastomer

Designed to withstand an increased differential pressure, HS88 delivers significantly higher available torque while drilling. This results in faster ROPs, less downtime, reduced operational risk and increased well profitability. HS88 handles OBM better than any other elastomer, minimizing swell and providing optimal fit downhole for more reliable performance.

Powerful Solutions

- Power Section Design
- Stator Relines
- Applications Engineering Advisors
- Post-Run Stator, Rotor and Elastomer Evaluations
- Predictable and Dependable Performance and Results
- Manufacturing and Quality Redefining Industry Standards

Customer Service

We want our customers to succeed, and it shows. PV provides outstanding customer service and support beyond expectations. Our Applications Engineers and Power Section Performance Advisors use proven expertise and our historical run database to recommend the best power section selection per application. We are dedicated to finding the best solutions for our customers for the long run. Those solutions are found working closely with our customers, so they can perform confidently.

Unmatched Quality

Our new, state-of-the-art manufacturing facility, coupled with meticulous quality inspection standards, yields the highest level of technological achievement in power sections in the world. Tight production tolerances enable us to provide consistent, quality products on which our customers have come to rely.

Proven Results

PV strives for excellence in every facet, resulting in consistent and successful drilling performance in the field. Just ask our customers. We are dedicated to helping our business partners be successful through the results our products and services provide.

Let's Get Started
